1. A comparison between planned and actual production in Thuringian industry in the fourth quarter of 1946 shows the success with which production quotas were met (expressed in millions of RM):

Industrial Branch	Planned Production	Actual Production	Percentage of Production Accomplishment
Raw Materials Industry			
Chemical Industry	12.167	9.734	80 %
Potassium	17.349	13.659	78.8 %
Glass and ceramics	14.855	22.481	151 %
Construction materials	3.505	6.088	174 %

Comment:

The percentage of accomplishment of schedule for knitted goods should be not 121 percent but 102 percent, and the figure for leather products is not 119 but 123.9 percent.

2. The following figures, expressed in millions of RM, show the production plan for the first and second quarters of 1947; the first quarter program was confirmed by SMA, but the second quarter is presumably only the projected plan:

Industrial Branch

	First Quarter		Second Quarter	
	Total Product	Soviet AG Product	Total Product	Soviet AG Product
Raw Materials Industry				
Metallurgy and mining	15.939	12.785	22.748	16.931

Comment: The figures given above differ entirely from those supplied by another source, considered reliable, in a report of 18 January 1947. The variation may be partly attributable to the later date of this report, since according to source the Soviet production schedule for Thuringia was formally confirmed to the Ministry of Economy, Labor, and Traffic on 28 January 1947.
